

Operating system

Purpose

The purpose of the business system is to establish, maintain and constantly improve the documented system to ensure that the products of the company comply with the requirement.

The company shall establish routines for identification, registration, archiving and maintain quality documents.

Extent of the operating system

Masonite Beams have an environmental and quality management system certified according to ISO14001: 2015 and ISO 9001: 2015. The management system covers all the activities, products and services within Masonite Beams.

The management system documentation is collected in the handbook on the company intranet.
